DETAILED ACTION

Allowable Subject Matter

1. Claims 1-28 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter.

Claims 1 and 14 recites, inter alia, "receiving at least a portion of the request data from the peripheral device, which based on the mapping is directed by the host controller to the allocated buffer without processing the requested data through the protocol stack" and also "upon receiving the at least a portion of the requested data into the allocated buffer, an act of deactivating the data request instructions in the host controller schedule". Prior art of record do not teach or suggest, either alone or in combination, the aforementioned limitation, nor would it be obvious to modify those references to include such limitation.
